About Risco Agility 3

Agility™ 3 is a state-of-the-art, high end professional 2-way wireless alarm system designed for the residential and small business markets that provides more than a standard home security system.

Agility™ 3 is a fully wireless system which means minimum disruption and mess for installation and is also easy to move. Unlike other manufacturers systems it includes a remote keypad so the main control unit can be installed out of sight. The system is very flexible and can be programmed to suit your

requirements and very easy and simple to use. The system includes an on-board voice dialler as standard which can be wired to your LAN telephone line and ring up to 16 numbers should the alarm go off.

Agility™ 3 supports visual verification with a self-monitoring Smartphone app (also available via web browser) which enables homeowners to control their alarm systems remotely as well as view real-time images taken inside their premises with the eyeWave™ wireless PIR camera detector which communicates with the RISCO Cloud server.

In the event of an alarm, the PIR Camera or IP Camera is automatically activated and captures a sequence of images which it sends to users via RISCO's Smartphone/ web Application. This capability enables users to view the images and confirm if there is a crime in progress.

The Agility™ 3 wireless security system can be enhanced with a wide range of accessories that provide additional protection against theft as well as protection against environmental hazards and providing elderly care.

20% Deposit required on order, balance on completion of works. Lead time typically 7-14 working days (sometimes less). Full 1-year warranty on parts and labour, excludes batteries. Current offers valid for next 30 days.

Please contact us if you have any questions. We can customise any system and provide a bespoke quotation. *Prices based on typical installation subject to change a site survey.

Risco LightSys2 Hybrid Wireless Alarm System - 50 Zone.

The LightSys2 benefits from many of the features of the Risco Agility 3 with the benefit of adding Wired as well as Wireless devices.
