

City Aerials & Security offer a full installation and setup service for flat screen TV's including LCD, LED & Plasma. This service can include the required heavy duty brackets, fixings, cable management system, installation and setup of all equipment .

We use the latest cable management system for a low profile installation with minimum disruption and mess. This system also makes adding and removing new equipment quick and simple.

Alternatively, we can install your own bracket & equipment if suitable.

A Typical Installation Includes;

- Assessment of all equipment & identification of all required leads and additional parts.
- Assessment of the required position and wall structure and suitability
- Advice / Discussion on best position for TV, equipment and correct bracket type
- Assessment of required power and availability
- Test of signal strength & condition from TV aerial and or Satellite dish
- Advise on any reception improvements that may be required
- Full explanation of requirements and work involved
- Supply & install of flush, tilt or swing brackets
- Installation of required heavy duty wall fixings
- Television setup and tuning
- Routing of cables to required components & cable management
- Setup & Tuning of all other Equipment

All standard installations are inclusive of the required heavy duty bracket and fixings, cable trucking, labour & Setup. Sizes of TV we can Install with *typical pricing listed below.
